 BLUEPRINT
CERAMICS

Lead the scene, keep it green

BluePrint Ceramics understand that sustainability is an increasingly key component in material specification for modern buildings. Our ecoLOGIC range combines verifiable eco-credentials with exceptional aesthetics to provide specifiers a huge range of choice to create amazing spaces that are environmentally sustainable. All material found within the range contains at least 40% pre-consumer recycled material, achieving a BREEAM A+ rating.

For more information on environmentally sustainable specifying, contact our sales team on 0121 268 3240 or email info@blueprintceramics.com.

The Building Research Establishment Environmental Assessment Method (BREEAM) is a leading design and assessment method for sustainable buildings; it sets the benchmark and high standard for the best practice in sustainable design. The assessment measures the buildings performance against established criteria. There are a spectrum of relevant topics that the assessment is made over ranging from materials right through to ecology and energy. The areas that are titled consist of waste, ecology, pollution, transport, materials, the environmental health (health and well-being), energy & water use and management systems.

As a client, by achieving a BREEAM rating you can benefit from the following:

- Market recognition for low environmental impact buildings
- Confidence that tried and tested environmental practice is incorporated in the building
- Inspiration to find innovative solutions that minimise the environmental impact
- A benchmark that is higher than regulation
- A system to help reduce running costs, improve working and living environments
- A standard that demonstrates progress towards corporate and organisational environmental objectives

The following extract has been taken from the BRE (Building Research Establishment) website referring to hard floor finishes to offer the environmental rating awarded by BRE:

	Element number	BRE Summary rating
Cement based terrazzo tiles.	821580007	E
Ceramic floor tiles.	821580001	B
Porcelain Floor Tile (40% recycled content) 11mm thick, ISO13006 Type B1A	1021580001	A+
Porcelain Floor Tile, 4mm thick, ISO13006 Type B1A	1021580002	A+
Resin based terrazzo/agglomerated stone/composite tiles (10% resin content).	821580018	D
