

WOODTECH 4

WOODTECH 4

The warm appeal of wood combines with the functionality and resistance of porcelain stoneware in the Woodtech 4 collection, inspired by larch wood and widely used in traditional alpine architecture. Woodtech 4 is the result of intensive research on the features of this natural material that is reinterpreted on ceramics, reproducing its graphics and texture, its chromatic and surface details and the marks caused by the passage of time and by adverse weather.

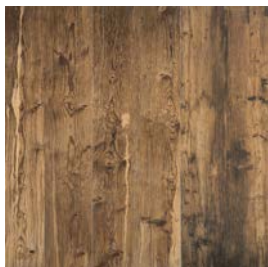

Lead the scene, keep it green
